### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

Claim 14, line 1, "its" has been changed to --is--.

The following is an examiner's statement of reasons for allowance: a method and apparatus for evaluating a recovered clock signal are disclosed. The closest prior art, Japanese Patent No. JP02001056723A, discloses similar method and apparatus. However, the Japanese Patent does not teach or fairly suggest the limitations of "providing a rate of change of an interpolation ratio according to which first and second phases of a local reference clock signal provided by the data communication receiver are combined to form the recovered clock signal; and in response to the rate of change information, determining whether a phase difference between the recovered clock signal and the local reference clock signal exceeds a predetermined amount of phase difference. Such limitations as recited in the base claims, are neither anticipated nor rendered obvious by the Japanese Patent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
